Standard Tariff

Standard Tariff determines how consumption is charged. It is configured accordingly, taking into account the connection voltage level and the customer's consumption behavior.

As commercial consumers are considered shops, offices, hotels, supermarkets, shopping centers, etc. Accordingly, as Industrial consumers are considered factories, laboratories, pumping stations, etc.

Below are the four tariff categories:

Tariff WS40

Applies to installed load connected to the medium voltage level (11 kV /22 kV), with the consumer's behavior being Commercial or Industrial.

Tariff WS30

Applies to an installed load of more than 70 kVA , connected to the low voltage level (400 V), with the behavior of the consumer being Commercial or Industrial.

Tariff WS20

Applies to an installed load below 70 kVA , connected to the low voltage level (400 V), with the consumer's behavior being Industrial.

Tariff WS10

Applies to an installed load below 70 kVA , connected to the low voltage level (230V/400V), with the consumer's behavior being Commercial.

Electricity Consumption

The consumption periods are listed, where the electricity charging prices changed, depending on the season and the time of the day when the consumption takes place.

These periods are determined by the Organization with a dominant position based on the load curve of the system, with the ultimate goal of smoothing it as much as possible, which will result in a reduction to operating costs.

They are identified according to the periods of the day (peak and off-peak hours) and the season (October – May and June – September) when load rollover is desirable or undesirable and through its tariffs encourages or discourages the use of electricity in these periods.

The table below shows in detail the pricing periods currently in place:

Pricing Structure				
Periods	Description			
	October - May		June - September	
	Weekdays	Weekends and Holidays	Weekdays	Weekends and Holidays
Peak	16:00 - 23:00	16:00 - 23:00	9:00 - 23:00	9:00 - 23:00

ABIO Tariff

It is the customer's charge for the hours during which the supplied energy is produced by Renewable Energy Sources.

Total

It is the total of the monthly energy consumption of the premises in kWh that combines the charge of Standard Tariff and the charge of ABIO Tariff.

Standard Tariff

It is the customer's charge for the hours during which the supplied energy comes from the Organization with a dominant position (ODTH), meaning the hours where there is no production from Renewable Energy Sources.

Fuel Adjustment

It is the percentage of electricity available to ABIO POWER LTD where it comes from the Organization with a dominant position (ODTH). ODTH uses fossil fuels and therefore the tariffs approved by CERA need to be adjusted based on the actual cost of fuel. The adjustment is done on a monthly basis.

SELF INVOICE
The specific bill is sent to the customer in case he produces energy through a PV System – Net Billing.

Exported Energy
Illustrated the energy produced by the self-producer.

Total Credit Amount
It is the customer's total credit amount (auto producer) including VAT.

BILL EXPLANATION

ABIO POWER LTD is committed to making electricity available to its customers on competitive and transparent terms. According to the decision of CERA, the visible presentation of the specific charges of energy costs is required as follows:

- **Consumption Data:** Cost of production of consumed electricity.
- **Network Use:** The usage cost of the Transmission & Distribution networks and the cost of the Cyprus Transmission System Operator (TSO).
- **Ancillary Services:** The cost for the safety and uninterrupted operation of the electricity system.
- **Consumption Measurement:** The cost of recording the meter reading.
- **Electricity Supply:** The cost of the electricity supplier's services for the management and service of its customers.

Special Tariff Discount: When CERA decides to apply a general reduction in the final price of electricity, except for VAT, RES and ES fund. This concerns specific cases.

Fuel Adjustment: A percentage of the electricity available to **ABIO POWER LTD** comes from the Organization with a Dominant Position (ODP). The ODP uses fossil fuels and therefore the tariffs approved by CERA need to be adjusted based on the actual cost of fuel. The adjustment is performed monthly.

Public Service Obligations (PSO): According to a Ministerial Decision, the charge for PSO is applied to cover specific categories of vulnerable consumers.

RES & ES Fund: Special fee that **ABIO POWER LTD** collects and pays to the Fund for Renewable Energy Sources (RES) and Energy Saving (ES) of the Ministry of Energy, Commerce, and Industry.

Energy Mix of Electricity for 2022:

Type of Fuel	ABIO POWER LTD* Energy Mix	Cyprus Energy Mix
Conventional Fuels	84.8%	84.4%
RES	15.2%	15.6%
Other Sources	0.0%	0.0%

Note: *ABIO POWER LTD was not active as an Electricity Supplier during 2021.

Y – Estimated consumption: The symbol "Y" appears next to the meter reading if recording is not possible. The estimate of your consumption was based on the actual consumption of the corresponding bill of last year. The adjustment of the estimated consumption will be made when recording your next meter reading.

Termination of Supply at the Request of the Customer: If you will leave your premises, please inform **ABIO POWER LTD** in time so that you are not charged with consumption that may arise from third parties, until the date of transfer and / or reconnection to the next customer.

Ways of Bill Payment: By deposit in the bank account as indicated on the invoice or by automatic payment via bank transfer (Direct Debit).

Energy Agencies:

1. Cyprus Energy Regulatory Authority (CERA), Agias Paraskevis 20, 2002 Strovolos, www.cera.org.cy, regulator.cy@cera.org.cy
2. Cyprus Energy Agency, Lefkonos 10-12, 1011 Nicosia, www.cea.org.cy, info@cea.org.cy
3. Cyprus Transmission System Operator (TSO), Evangelistrias 68, 2057 Strovolos, www.tsoc.org.cy, mail@dsm.org.cy
4. Cyprus Distribution System Operator (DSO), Amfipoleos 11, 2025 Strovolos, www.eac.com.cy, eac@eac.com.cy
5. Ministry of Energy, Commerce and Industry, Andrea Araouzou 6, 1421 Nicosia, www.meci.gov.cy, perm.sec@meci.gov.cy

On the back of the invoice are presented important explanations and information regarding the bill for ABIO POWER LTD customers.
